

European Plastic Energy Storage Systems Association

EuPC Sector Group

WHAT IS PLASENSYS?

PlasEnSys, the **European Energy Storage Systems Association**, is a sector group of EuPC that stands as a leading association dedicated to representing the interests of the **plastic energy storage systems industry** within the automotive and transport sectors. With over 20 years of experience, PlasEnSys fosters collaboration, knowledge sharing, and innovation, adapting to the ever-evolving regulatory and industrial landscapes.

Originally established to advocate for the interests of **plastic fuel tank manufacturers**, the association expanded its scope in 2022 to encompass the **broader realm of energy storage systems for vehicles**. This includes solutions for fuel, hydrogen, CNG, battery-electric, biofuels, and e-fuels, with a focus on storage, supply, refilling, venting, and thermal management.

OUR MEMBERS

OUR ACTIVITIES

EU advocacy & representation: Acts as the members' voice towards EU institutions on key files impacting plastic energy storage systems (e.g., PFAS, End-of-Life Vehicles, Euro 7/vehicle emissions).

Regulatory monitoring & member briefings: Tracks legislative and policy developments and delivers actionable updates and tailored reporting to help members anticipate compliance and business impacts.

Market intelligence: Shares insights on automotive/transport market trends and emerging technologies, plus EU and national vehicle sales trends discussed in meetings.

Direct institutional access: Provides structured channels to engage with EU policymakers and contribute evidence-based positions, often in coordination with other value-chain associations.

Participation in Commission expert fora: Facilitates industry representation in the Advisory Group on Vehicle Emission Standards (AGVES), giving members insight and influence on evolving emission standards and testing methods.

Technical projects: e.g., Coordinated group effort to reduce the timing of the German OEMs test procedure
